Courses

Department: Wealth Distribution
Code: Wealth-101
Teacher: Dr. Christophe Faugère
Cost: €250 (or €50 per session)

Mastering prosperity in a world of money:

It is quite astonishing that across the world, the schooling system does NOT teach us about mastering prosperity and money. Yes, in many business schools you do learn techniques about managing people, projects and perhaps start your own company. Finance, which is about allocating resources to grow a corporation or a portfolio, is actually *not* about MONEY and prosperity the way we ought to address it in our educational system.

In this course, I attempt to fill this gap. Here is an exploration of what money is. How it came about in the world, what meaning we attach to it, how we relate to it, how people attract it and most importantly what is the “secret sauce” behind money and prosperity.... Won't tell yet... You have to wait till the end to find out! My goal is that this material and the associated series of practical exercises offered here will inspire you to develop your own mastery about money and a new understanding of what wealth and abundance really are.

Think about it: in your family circle, how important is the issue of money? How many times have your parents or relatives talked about or have communicated explicit or subliminal messages about having or not having money to buy a car, to go on vacation, etc...People talk about it, some people worship it, others despise it, others live in the fear of not having enough, still others fear that their fortune will be taken away. Have you ever thought about what money really is?

This online course is divided in 5 main sections. We will look at the history of money; how money is created; the mythology and the psychology of money, the way money circulates in the financial system and finally, the connection of money and prosperity with quantum physics!

There are no textbooks for this course. On the other hand, an extensive collection of online youtube videos (I developed) and readings are posted online, as well as other interesting videos that cover topics we want to focus on here. The videos are free to watch online (the module is entitled MASTERING MONEY).

<https://www.youtube.com/watch?v=5fCm9C0Jyck&list=PLZ-m3L5t8jjEENE8KIHcZbQrNh-WCfy>

At the end of each session, you will have online assignments, practice exercises and games to play in your everyday life. My goal is that these will provide interesting breakthrough experiences and empower you in your relationship to money and wealth in your future life and career.

COURSE CONTENT AND TIMETABLE

SESSIONS	TOPIC	PRELIMINARY READING(S)	ADDITIONAL READING(S) AND ASSIGNMENTS
1	Introduction: What is Money? 1. What is mastering money? 2. A simple story? Money vs. Credit 3. Money creation: the classical explanations 4. Why gold?	TBA online

5	How to Attract Wealth, Abundance and Money? 1. Quantum Physics and money 2. What is it you really want? 3. How do wealthy people get wealthy? 4. The secret sauce	TBA online	

EVALUATION OF STUDENT PERFORMANCE

DELIVERABLES	%
Online assignments and journaling	100%

To PASS this course, students have to submit their assignments (at the end of each session) to me at an email address that will be communicated directly to you in due time. Each assignment is about self-inquiry and my role is to provide feedback similar to what a life coach does. I am here to encourage you to be empowered about these issues.

MY BIO

Dr. Christophe Faugère

Christophe Faugère (pronounce Fo-Jair) obtained his Ph.D. in Economics from the University of Rochester, NY USA, in 1993 and a Masters in Mathematical Economics in 1987 from the University of Toulouse. He is currently Professor of Finance & Economics at Kedge Business School, Bordeaux and was the Chair of the Finance and Economics Dept. there from 2015-2018. Prior, he was an Associate Professor and Chair of the Finance Department at the UAlbany School of Business, NY, USA.

Christophe has taught courses in Investments, Corporate Finance, Derivatives, Fixed Income, Macroeconomics and Monetary Economics at the graduate and undergraduate levels, as well as in executive programs in the US and France. In 2006, he received the UAlbany School of Business Harold L. Cannon memorial award for best teacher at the undergraduate level and was voted best professor in the UAlbany School of Business MBA program in 2002. His preferred areas of teaching are stock market valuation, modern portfolio theory, asset pricing, market risk premia, financial crises, monetary policy, ethics and mindful finance and behavioral finance.

His current research focuses on mindful finance, ethics, the workings of financial markets and monetary economics. His main past achievement is the development of models of asset valuation (gold, Treasuries, stock indexes, tech stocks) based on combining rational and irrational investor behavior. This research has culminated in the co-invention of **Required Yield Theory** one of the most accurate theory for valuing the S&P 500 and gold. Christophe has extensively published in top tier US academic journals such as the *Journal of Portfolio Management* and *Financial Markets, Institutions & Instruments*. One of his published articles on “Sell Discipline” received extensive coverage in the *New York Times* and *International Herald Tribune* in 2004.

Christophe has been a practitioner of meditation (Zen, Tibetan, Siddha Yoga) for about 20 years. He loves tennis and in particular has a great admiration for Roger Federer.
